PREFACE.

THE first volume of the Catalogue of the Library of the British Museum (Natural History) was published in 1903, and, like the succeeding four volumes, 1904–1915, it was prepared by Mr. B. B. WOODWARD. The time has come for the issue of a Supplement, the first part of which, forming Vol. VI of the complete series, has been compiled, with some clerical aid, by the same author, on the lines laid down in the Introduction to Volume I.

During the progress of the work Mr. WOODWARD has received assistance from the following representatives of the several Departments:—Zoology—Dr. W. T. CALMAN, F.R.S.; Entomology—Mr. J. HARTLEY DURRANT, who has contributed many valuable bibliographical notes, particularly under the headings Godart and Herrich Schaeffer, in the present part; Geology—Dr. F. A. BATHER, F.R.S.; Mineralogy—Dr. L. J. SPENCER; Botany—Mr. A. J. WILMOTT, B.A.; as well as from Mr. BASIL H. SOULSBY, M.A., the present Librarian in the General Library.

A special acknowledgment is due to Mr. C. DAVIES SHERBORN, who has continued to place the valuable bibliographical data collected by him for the “Index Animalium” at the author’s disposal.

SIDNEY F. HARMER,
Director.

ANNALES DES SCIENCES D'OBSERVATION, comprenant... la Minéralogie, la Géologie, la Physiologie et l'Anatomie des deux règnes, la Botanique, la Zoologie... Par MM. Saigey et Raspail. Tom. I-IV, no. 2. *illust.*† 8°. Paris, 1829-1830.

So far as known, this copy of the "Annales" is the only one in Britain. It was Raspail's own copy, purchased by him in 1856, at the sale of the collections of a Mons. Robyns of Brussels. It contains an autograph Index by Raspail to Tom. IV, his notes giving the history of the periodical, and of this copy, also his signature. Soon after this date (1856) Raspail had bound together, and placed with the set as "Supplément," copies of two of his works, entitled:—"Histoire naturelle des Ammonites, 1842," and "Nouveaux coups de fouet scientifiques, 1831"; and two plates numbered "12 bis" & "13" belonging to his "Essai de Chimie microscopique appliquée à la Physiologie, *dc.*" running in the "Annales" (see Tom. IV, pp. 225-251). All these, and a continuation of the "Essai," were to have formed the third and concluding number of Tom. IV, but owing to political and other reasons the publication of the "Annales" was suspended (1830) at p. 320 of that volume.

Although the continuation or concluding part of the "Essai" is not included in this "Supplément," Raspail published the whole as a separate work the following year (1831). [See Bibl. Fr. 12 Fév. 1831.]

The wrapper to Part VI has been used in lieu of the title-page; all other wrappers are wanting.

This copy includes fourteen pages of text and twenty plates which do not appear in the list of contents issued with the parts, and may therefore never have been published. The majority of coloured plates in this copy were those that served as patterns. A "proof" of the text written by J. E. Gray to accompany the set of plates which were afterwards issued in 1872, under the title of:—"Tortoises, Terapins & Turtles," by J. de C. Sowerby and E. Lear, has been inserted in this copy.

— [Another copy.]

Wanting all the wrappers, and the plates of *Emys ornata* (adult) and *Chelonia mydas*.

In this copy the text and plates, published and unpublished, are arranged in systematic order.

— [Another copy.]

Wanting title-page: the wrapper to Part V has been used in lieu of title-page, all the other wrappers are wanting, as also the following of the unpublished plates:—*Testudo græca*, *Emys elegans*, *E. ornata* (2 plates), *Hydraspis galeata* (2 plates), *Chelonia mydas*, and *C. imbricata*.

[Buffon (GEORGES L. L. DE) *Count.* *Histoire Naturelle, &c.* (contd.)]

Oiseaux, Tom. XXXVII-LXIV, also appeared as a separate work with independent title-pages, and some of the volumes in the Zoological Department [=2nd set] belong to that issue.

In the Tweeddale Library there is a set of the section "*Oiseaux*," with the covering titles, but bearing date: Vol. XXXVII-LVI, An IX; LVII, An XI; LVIII-LXIV, An X.

In this set also the number of pages in some of the volumes differs from those in the other, mostly owing to the different setting of the "Table."

Plantes, Tom. I & II "*Traité d'Anatomie et Physiologie Végétales*" also appeared as a separate work, and in that form ran to a second edition in 1813.

In both sets, Tom. I belongs apparently to that issue, instead of the "Suites."

There is a copy in the Botanical Department of Tom. VIII, bearing date 1806.]

"Ex Biblioth. Boisy. MS. No. 21."

According to a note on the last leaf, in a different handwriting, it appears that this MS. was transcribed from the original which was in the library of Commander de Smitmer; that its authorship is established by Père Allegranza in his life of Buonamici, and a letter from the latter dated Sept., 1670, shows that he had dedicated it to Dominique Magri, Canon of Viterbo; and further that it was printed by F. P. Cavallini in 1689 under the title "Pugillus Meliteus," &c. (when it formed pp. 109–129 of his "Brevis enumeratio Plantarum," &c.), and reprinted by Brückmann ("Epistola itineraria 62 Cent. II, &c.), in 1797; in both cases the name of the author was suppressed and the vernacular names of the plants, given in this MS., omitted.

In the first series of the "Bulletin" there are separately paged appendices to each annual volume, whilst each paper bears its own pagination in addition to that of the volume.

In the "Mémoires" each of the 22 numbers is separately paged, and most of them contain only a single paper each.

In the second series of the "Bulletin" the additional running pagination is resumed, and there are no appendices.

Several monographs were published in sections running through the several series.

The first supplement to the "Index Bryologicus" of É. G. Paris, (1900) [q.v.] is stated to have formed one of the contributions to the "Mémoires," but was apparently never included in the volume.

China. [521 water-colour drawings by native artists of Chinese Animals and 654 of Chinese Plants forming the collection of J. Reeves.] fol. [1822-29.]

Four copies were made of the drawings of Fish (498 figs. on 125 foll.). Three of these are in the Museum, viz. :—(1) Reeves' own series, (2) that given to Sir J. Richardson and used by him for his "Report" [q.v.], and (3) the set sent to General Hardwicke, included in his collection of drawings [q.v. under INDIA]. The translations of the Chinese names on the second set were made by Dr. Birch (*vide* Dr. A. Günther). The fourth set was left behind in Macao with a Mr. Beale, and was utilized by E. C. Bridgman in his "Chinese Chrestomathy" (4°. Macao, 1841).

For MS. notes accompanying these drawings, See REEVES (J.).

CURTIS (JOHN) [1791-1862] *British Entomology; being illustrations and descriptions of the genera of Insects found in Great Britain and Ireland, &c. Pls. 1-769 & 205*, with descriptive letterpress.* 8°. London, 1824-39.

Issued in monthly parts beginning Jan. 1824, and ending Dec. 1839. The early numbers becoming exhausted, a "second edition" of them was issued by the author. The text in pt. 1-8 was rewritten and enlarged; pt. 9-30 were reset, but otherwise reprinted without alteration. of the remaining parts (31-192) there was only one issue. The work was originally formed into 16 (annual) volumes; but new title-pages and indexes were provided on its completion, permitting of its re-arrangement, systematically, in 8 volumes. [For further details, See article by SHERBORN & DURRANT, Entom. Monthly Mag., 1911, pp. 84, 85.]

The following copies of the work are in the Museum:—

— Vol. I. [Pt. 1-12.] *illust. col.* 8°. London, 1824.

This consists of the first issue, with the addition of a copy of the "second edition" of the text and plate to No. 6.

— Vol. I-VIII. *illust. col.* 8°. London, 1824-31.

Vol. I is of the first issue, except no. 1-6, which are of the "second edition." This copy came from the library of the 2nd Earl of Sheffield.

— ["Second edition."] 16 Vol. *illust. col.* 8°. London, 1824-39.

A set of the second title-pages (dated "1823-1840") and indexes for re-arranging the work in systematic order is included at the end.

— — [Another issue.] 8 Vol. *illust. col.* 8°. London, 1862.

In this issue portions of the text have been reprinted and some of the plates redrawn, and the whole gathered into eight Volumes, with new title-pages. Vol. VIII, however, has one of the title-pages dated 1823-40.

Curtis (JOHN) *A Guide to an arrangement of British Insects, &c. pp. vi, coll. 256 [pp. 2].* 8°. London, 1829 [-1831].

Printed in double column.

Issued in 8 parts (i.e. sheets): pt. 1, coll. 1-32, in 1829 (Mag. Nat. Hist. Vol. II, p. 453); pt. 2-4, coll. 33-128, date uncertain; pt. 5, coll. 129-160, in 1830; and pt. 6-8, coll. 161-256, in 1831.

The date "1831" occurs on the printed label on the wrapper. The copy in the Walsingham library wants this label, but has a manuscript Index to the Genera.

— [Another copy.]

Interleaved. Contains notes and manuscript additions by J. C. Dale, who presented it to the Insect Room (Entomological Department) in 1868.

— [Another copy.]

Incomplete: wanting columns 249-256, and the printed label to wrapper bearing the date 1831. This copy also belonged to J. C. Dale, and contains manuscript notes and additions by him. He evidently used it to circulate with specimens among his friends. It is marked in manuscript by himself and by them. Pages 284-294 of the "Index of Genera," issued with the second edition in 1837, have been inserted at the end of this copy.

— Second edition, &c. *pp. vi, coll. 282, & pp. 283-294 = Index of Genera.* 8°. London, 1837.

Printed in double column.

Curtis (JOHN) *Observations on the natural history and economy of the different Insects affecting the Turnip Crops.—Corn-Crops, &c.—Peas and Beans, &c.—Pea-Crops, &c.—Carrots and Parsnips, &c.—Potato-Crops, &c.) 15 Papers. illust. (col.)* 8°. London, 1841-49.

Journ. Roy. Agric. Soc. England. Vol. II-X. These are the original papers on which the author founded his "Farm Insects" [q.v.].

Curtis (WILLIAM) *Botanist. Flora Londinensis; or, Plates and Descriptions of such Plants as grow wild in the environs of London, &c. 432 pls. col., with descriptive letterpress.* 3 Vol. fol. London, [1775-] 1777 [-98].

Issued in 72 numbers, each containing six plates; these were gathered by twelves into six "Fasciculi." For a list of contents, with dates of publication, See note by W. A. CLARKE in the "Journ. Bot." Vol. XXXVII, 1899, pp. 390-395. The only title-page present is marked "Vol. I."

A portrait of the author and a manuscript Index have been added in this copy.

[**Curtis** (WILLIAM) *Botanist* (contd.)]
[Flora Londinensis, &c. (contd.)]

— [Another edition entitled:] *Flora Londinensis*; containing a history of the Plants indigenous to Great Britain ... A new edition, enlarged by G. Graves and W. J. Hooker. 647 pls. col., with descriptive letterpress. 5 Vol. fol. London, 1817-28.

This copy has been bound in systematic order, and references supplied in manuscript on the "General Index."

Printed in double column.

Enumerates 6,692 species. A small preliminary list of 910 species was printed by the author in 1802, and a few copies distributed by him in his last years. This has been reckoned by Hagen as the first edition. Hagen's account of the series of editions is not quite accurate.

— [Second edition entitled:] Catalogue des Coléoptères de la Collection de M. le Comte Dejean. pp. 443. 8°. Paris, 1833 [-35].

Printed in double column.

The work was issued in five livraisons as follows:—
Liv. 1. Pp. 1-96: Jan. 1833, Bibl. Franc.

" 2. " 97-176: Jul. 1834, Ann. Soc. Ent. Fr.

" 3. " 177-256: 1834, Ann. Soc. Ent. Fr.

" 4. " 257-360: Aug. 1835, Bibl. Franc.

" 5. " 361-443: 1835, Ann. Soc. Ent. Fr.

The stock of the first four livraisons having been burnt, only a few

copies of the complete book, showing 20,909 species, exist.

The work was immediately reprinted with additions, as:—

— Troisième édition, &c. pp. xiv, 503. 8°. Paris, (1836-) 1837.

Printed in double column.

Livr. 1-4 were issued in one part July, 1836, and livr. 5 (pp. i-xiv, 386-503) in May, 1837. 22,399 species are enumerated.

[A fragment of a mænus for the month of January of the 10th or 11th century.] fol. 486–491.
The original codex was prepared about A.D. 500 for Anicia Juliana (c. 463–c. 527) a patrician of Constantinople. It subsequently passed into the possession of the monastery of S. Joannes Prodromus, or Precursor. Whilst there it was carefully repaired in 1406, a second index written on the rectos of fol. 4–7 and numerous annotations made throughout. The mænus possibly became attached to it at this period.
With the fall of Constantinople in 1453, the codex came into Turkish hands, and inscriptions in Turkish and Arabic were added beside the figures of the plants. Later it was owned by some Jew who added transcripts of the Greek names in Hebrew characters.
In 1569 it was bought by the antiquary and ambassador Angier Ghislen de Busbecq, or Bousebecque (1522–1592) for the library of the Austrian Emperor Maximilian II.

[Dioscorides (PEDACIUS) (contd.)]

De Codicis Dioscuridei Aniciæ Iulianæ, nunc Vindobonensis Med. Gr. I, historia, &c. pp. [ii,] 490 [1]: 3 pls., text illust. 8°. *Lugduni Batavorum*, 1906.

This is a reprint in 8° form of the prefatory text to the foregoing, and was issued as an advertisement of that work.

Dioscorides (PEDACIUS) [Materia Medica. 418 folios of water-colour drawings, mostly of Plants, being copies of those in the Codex made for Anicia Juliana, about A.D. 500, and now in the Imperial Library at Vienna.] fol.

Forms Banksian MSS. No. 63, and bears the inscription in Dryander's writing: "E Bibliotheca Iacobi Soranzo emptus est Codex hic Patavii, 1782." (Cf. "Cat. Bibl. Banks," Vol. I, p. 95.)

The water-mark in the paper, an open pair of scissors, corresponds with one figured by Briquet ("Les Filigranes") in papers dating from 1458 to 1477.

In the case of the Plants each drawing has the name written in Greek at the top, apparently at the time of execution, and in Latin at the bottom in a later hand. These Latin names are seemingly taken from Mattioli, Dodoens, Lécluse and L'Obel: there is no allusion to Linnaeus.

The drawings are arranged, as in the Vienna Codex, in alphabetical order of the first letter of the Greek name, but, the arrangement not being carried further, the order in the two is not always the same: moreover, some of the folios in the Banksian Codex have been misplaced in the binding.

The first drawing, "ἀειζων το ἀναπαντων (Sempervivum minus flore luteo)," is not in the Vienna Codex, nor cited in either of the two indexes to that work.

Unfinished sketches of the five illuminated designs on the verso of fol. 2-6 respectively of the Vienna Codex are bound in at the end of this one, and followed by very rough copies of the drawings of the animals on the later folios of the Vienna Codex, except those on fol. 395v to 398r, which would seem to have been intentionally omitted. The later date drawing on fol. 328r of the Vienna Codex was probably not seen by the artist of the Banksian Codex.

The drawings of three birds (ἀετος, ἀσπις and γυψ) on fol. 412 of the Banksian Codex are not in the Vienna Codex, which wants the folios on which they should occur.

Several of the drawings in the Vienna Codex, such as those on fol. 249r, 252r, 255r, and 260r have portions torn out, whilst the corresponding copies in the Banksian Codex are complete and show that they must have been made before the former was acquired by the Imperial Library at Vienna.

EDINBURGH MUSEUM OF SCIENCE AND ART.

- [1812 *Natural History Museum of Edinburgh* was established in connection with the University, and housed in its building.
 1854 The Patrons of the University transferred the entire control of the Museum to the Government. In this same year (1854) the *Industrial Museum of Scotland* was founded, and the interests of the two Museums united.
 1864-5 The Collections of the Natural History and Industrial Museums were transferred from their respective homes to the new museum built to receive them and renamed *Edinburgh Museum of Science and Art*.

— Fifth edition. [Edited by J. Millar.] 20 Vol. *illustr.* 4°. *Edinburgh* [1814–] 1815[–17].

Practically a reprint of the preceding edition. The Preface, which is dated 1 December, 1814, states that the first six volumes had already been printed by that date.

— Sixth edition. [Edited by M. Napier?] 20 Vol. *illustr.* 4°. *Edinburgh*, [1822–] 1823.

The "Advertisement" to this edition is dated "January, 1822," while three of the four plates to the article "Conchology" in Vol. VI, drawn by Capt. T. Brown, are dated 1820. Leach, who had been engaged and in part had planned some of the zoological articles for the "Supplement to the fourth, fifth and sixth editions" (See that work, Vol. I, p. xx), fell ill in 1821, and it seems possible that the article "Conchology" may have been begun by him, and finished by Brown.

— Supplement to the fourth, fifth, and sixth editions ... With preliminary dissertations on the History of the Sciences [by D. Stewart, J. Playfair and W. T. Brande]. [Edited by M. Napier.] 6 Vol. *illustr.* 4°. *Edinburgh*, [1815–] 1824.

The dates of issue of the several parts are given in the footnote to p. 1 of the "Table of Articles," &c., at the end of Vol. VI.

— Seventh edition, with preliminary dissertations on the History of the Sciences [by D. Stewart, Sir J. Mackintosh, J. Playfair and Sir J. Leslie] ... A general Index [by R. Cox], &c. [Edited by M. Napier, assisted by J. Browne.] 21 Vol. [in 24.] *illustr.* 4°. *Edinburgh*, [1830–] 1842.

In this copy the plates and maps have been bound apart in 3 volumes.

Paris [Jan. 1821-1822].

Printed in double column. Issued in parts with the "Histoire naturelle...des Mollusques terrestres," &c., of the elder Férussac [q.v.]. pp. I-XLVIII appeared in 1822, the rest in 1821.

— [Another edition.] pp. xlviii, 27, 111. fol. Paris [June 1821-22].

Differs from the preceding in the omission of the "Avertissement" at the beginning of the third set of pagination, and the re-pagination of the whole without other alteration, thus causing a difference throughout of 4 pages, whilst an additional "Table de Matières," 1 p., is added. This section is quoted in the "Histoire" of the elder Férussac as "Prod." and citations are made indifferently from either edition, thus causing great confusion.

Godart (JEAN BAPTISTE) Histoire naturelle des Lépidoptères, ou Papillons de France. Décrits par M. Godart, &c. (Continuée par M. P. A. J. Duponchel.) 11 Vol. [in 13], *illustr. col.* 8°. Paris, [1820–] 1821–40.

This work was originally undertaken by E. R. Genouville, and illustrated with plates by C. Vauthier. Three parts were thus issued, the first appearing in April, 1820. Genouville then abandoned the work and it was taken up by Godart, who recast and re-issued the text in Sept., 1820, adding thereto the extra sheet (3 bis) [Bibliog. France, 1820, pp. 225 & 477]. Plates 5, 6, 8, 10, 11 & 12 were at the same time cancelled and replaced, the first five by Delarue and the last by Duménil. Copies of the work containing examples of each of these series of plates are in the Entomological Department Library, both dated 1821, as well as the original wrappers to some of the livraisons of Vol. VIII and IX, and Supplément, Tom. I. On Godart's death in 1825, Duponchel continued the work, beginning with Tom. VI. Many of the sheets, and at least of one of the volumes, were reprinted at various subsequent dates, obviously in order to complete sets. The contents and dates of original publication so far as ascertainable from references in the "Bibliographie de la France," and the paper by J. DE JOANNIS in the "Ann. Soc. Entom. France," Vol. LXXXIV, 1915, pp. 67–74, are as follows:—

Only 40 copies printed.

It has been thought that the date on title-page was deliberately falsified (cf. Newman, "Zoologist," Ser. II, vol. X, p. 4668), but the occurrence of the date "1874" on p. 284, and the difference in the paper from p. 253 to the end, rather suggest that the first part had been printed off in 1867, because the companion volume on Botany appeared in 1866.

Hanley (SYLVANUS CHARLES THORP) [An illustrated, enlarged, and English edition of Lamarck's Species of Shells, comprising the whole of the recent additions in Deshayes' last French edition, with numerous species not noticed by that naturalist: accompanied by accurate delineations of almost all the shells described, and forming the third edition of the *Index Testaceologicus*. With illustrations by W. Wood.

8°. London (W. Wood), 1842-43.]

Wanting.

The work was issued and re-issued in instalments as follows:—

1°. *Pp. 1-52: 2 pls.*, at the close of 1842.

2°. *Pp. 1-144 [? pls.]*, early in 1843.

3°. *Pp. 1-224 + Systematic List of the Shells figured in this work, &c. pp. 8 + List of illustrations. pp. 3: 3 pls.* issued some time in 1843.

The figures on these three plates had been transferred to stone from certain original plates with a view to a more systematic arrangement of the component figures, but the process proved unsatisfactory and was abandoned. This appears to have necessitated a change in the scheme of the work, which was foreshadowed, judging from copies of it at this stage, by appending "A List of the Species delineated in the supplementary plates of the descriptive and illustrative Catalogue of Shells." This list refers to the original plates, ix-xiii, which were numbered in sequence to those in the "Supplement to the *Index Testaceologicus*," and issued shortly after.

4°. *Pp. 225-272* had appeared by the close of the year, *pls. xiv-xvi* about a year later, and *pls. xvii-xix* some two years later.

The work at this stage was issued as:—

— [Another edition entitled:] An illustrated and descriptive Catalogue of Recent Shells, by S. Hanley... The plates forming a third edition of the *Index Testaceologicus*, W. Wood. (Systematic List of the Shells figured in this work, &c.—A List of the Species delineated in the Supplementary Plates [ix-xix] of the descriptive and illustrated Catalogue of Shells.) *pp. 272, 8, 18: pls. ix-xix, col.* 8°. London (W. Wood) [1846].

Without title-page.

The wrapper to "Pt. 1. Letterpress" has been preserved, and this part, judging from the Museum stamp, probably contained the first 144 pages. The plates, according to wrappers in the possession of Mr. A. Reynell and confirmed by the entry in the Zoological Department Library accession book, were issued in three parts. The whole was acquired by the Museum in 1848.

— [Final issue entitled:] An illustrated and descriptive Catalogue of recent Bivalve Shells... with 960 figures by Wood and Sowerby [*i.e.* G. B. Sowerby, 2nd of the name], forming an appendix to the "Index Testaceologicus." *pp. xviii, 392, 24: pls. ix-xv.*

8°. London (Williams & Norgate), 1842-56.

The plates are numbered in sequence to those of the "Supplement" to Wood's "Index."

An advertisement at the end of the volume states that "This work, so long discontinued, is now resumed. Part IV of the Plates, containing 180 figures by Wood, to be published at Christmas [? 1856]... Part V concludes the Series."

fol. *Jacobus Meydenbach, Moguntia, 1491.*

In Latin; compiled chiefly from the German "Hortus Sanitatis" of J. von Cube.

Printed in double column, in Gothic Letter, without pagination or catchwords. Gathered in threes and fours (mostly alternately).

Register: Sig. A-Z, a-z, ⁊, aa-ll, i, v, A-E. 454 leaves, 47 lines to a full column, with many contemporaneously coloured woodcuts. The initial capitals have been filled in.

The last leaf, probably quite blank, is wanting in this as in most, if not all, known copies. There are a few manuscript notes. Seven full-page woodcuts of apposite design on the versos of A1, ni, tviii, ⁊viii, cxiij, ii, and vx form frontispieces to the several parts and the set of the Indexes.

— [Another edition.] *Ortus Sanitatis / De herbis ⁊ plantis / De Animalibus ⁊ reptilibus / De Auiibus ⁊ volatilibus / De Piscibus ⁊ natalibus (tibus / De Lapidibus in terre venis nascē / De Urinis ⁊ earū speciebus / Tabula medicinalis Cum directo- / rio generali per omnes tractatus.*

fol. [*Strasburg ? c. 1495.*]

Printed in double column, in Gothic Letter, without pagination or catchwords. Gathered in threes.

Register: Sig. a-z, Aa-ll, A-V, aa-ee. 360 leaves, 55 lines to a full column, with many woodcuts. The initial capitals have been filled in. The verso of the title-page is occupied by a large cut showing a professor, or doctor, lecturing to four students; the verso of the first leaf of the "Tractatus de Animalibus" has a rough cut of the Human Skeleton with the nomenclature of the several parts; whilst the verso of the first leaf of the "Tractatus de Urinis" has a large cut representing the interior of an apothecary's shop with two persons in it.

— [Another edition.] *Ortus Sanitatis / De herbis ⁊ plantis / De animalibus ⁊ reptilibus / De Auiibus ⁊ volatilibus / De Piscibus ⁊ natatilibus bus / De Lapidibus ⁊ in terre venis nascēti / De Urinis ⁊ earum speciebus / Tabula medicinalis Cum directorio / generali per omnes tractatus.*

fol. [*Strasburg ? c. 1497.*]

This edition is similar to that of c. 1495, except for some differences in the setting of the title-page and text, as well as in some of the small cuts, whilst the Register is: Sig. a-z, Aa-ll, A-O, PqrsT, V-Z, ⁊, aa-ee. The initial capitals have not been filled in.

— [Another edition.] *Ortus Sanitatis / De herbis ⁊ plantis / De animalibus ⁊ reptilibus. / De Auiibus ⁊ volatilibus / De piscibus ⁊ natatilibus (tibus / De Lapidibus in terre venis nascē / De Urinis ⁊ earū speciebus / Tabula medicinalis Cum directo- / rio generali per omnes tractatus.*

fol. [*Strasburg ? c. 1500.*]

This edition is similar to the two preceding, and is also in Gothic Letter, but differs in the font, the setting of the title-page and of the text, whilst the initial capitals are in type.

Gathered in threes, or, sometimes in fours. Register: Sig. a-z, A-Z, Aa-ll.

On the verso of the title-page is the large woodcut of the apothecary's shop, from which the top and bottom margins have been broken off. The recto of the first leaf of the "De Animalibus" bears the inscription "Sequitur alii tractatus," and below this four small cuts, one from each of the next following divisions of the work, with titles. The woodcut of the Human Skeleton is on the verso. The recto of the first leaf of the concluding section bears "Tractatus de Urinis" above a large woodcut representing a patient in bed attended by a doctor and two other persons. The verso bears a repetition of the damaged block of the apothecary's shop.

— [Another edition.] *Ortus Sa- / nitatis. / De herbis ⁊ plantis. / De Animalibus ⁊ reptilibus. / De Auiibus ⁊ volatilibus. / De Piscibus ⁊ natatilibus. / De Lapidibus ⁊ in terre ve / nis nascentibus. / De Urinis ⁊ earū speciebus.*

fol. *Venetis [post 1511].*

Printed in double column, without pagination. Catchwords only on the verso of each folio. Gathered in threes.

Register: Sig. a-z, Aa-ll, A-v, aa-cc. 350 leaves, 53 lines to the full column. The initial capitals have not been filled in. The title-page is imperfect, only the central portion with the print remaining.

The colophon to the "Tractatus de Lapidibus" reads:—"Impressum Venetiis per Bernardinum Benalium." The title to the final section reads:—"Tractatus de Urinis. / Et liber Galieni: De facile acquisibilibus." The small cuts in the text are German copies, redrawn and reversed from those of the preceding editions, and are far inferior to them. The large blocks have been changed. The portion of that on the verso of the remnant of the title-page shows the figures of three elderly persons; the Human Skeleton, coarsely redrawn, occupies the same place as in the earlier editions; the block on the verso of the title-page to the "Tractatus de Urinis" is of Italian workmanship, and depicts four doctors inspecting the contents of vessels handed to them by three attendant youths.

Insecta Britannica. 5 Vol. 8°. London, 1851-1859.

According to Mr. Lovell Reeve's advertisement (pasted in H. T. Stainton's own copy of his "Lepidoptera. Tineina," 1854, in the Walsingham Library) a series of volumes by different authors (q.v.), under the patronage of the President of the Entomological Society of London, was to appear at intervals, and the first named were:—

Vol. I. Diptera. By Francis Walker.

II.

III. Micro-Lepidoptera. By H. T. Stainton.

IV. Hemiptera & Homoptera. By W. S. Dallas.

V. Diptera. By F. Walker.

The only volumes so published were:—

Vols. I-III. Diptera. By F. Walker (q.v.) 1851-56.

Unnumbered: Lepidoptera. Tineina. By H. T. Stainton. 1854.

The British Tortrices. By S. J. Wilkinson (q.v.) 1859.

This volume was published under the auspices of H. T. Stainton, the instigator of the whole project.
